

Helping The Community - Shé D'Montford

Shambhalla Awareness Centre News Letter No.4 2009

Greetings All

Thank you for allowing me to be part of your journey!

Apart from the opportunity to show a prime time viewing audience that this 'stuff' really works, it has been my aim, since I came out of seclusion to continue my one-on-one work, that the community would be enriched by it. To my very great pleasure it is. So much has been accomplished in the last year. There are over 900 new confident psychic readers with their natural abilities properly trained that have begun their own journey of assisting the community. The feed back from you all has been wonderful.

"Hi Shé, I attended a psychic awareness workshop at Carrara about a year or so ago. ... The night surprised me, as I was able to accurately read the people I was paired with for the exercises. I am interested in using this skill for healing, and will soon be a registered homoeopath, to help with this. I would appreciate notification of any future workshops you are conducting to help further develop this skill in a positive manner. Thank-you, and I hope you are well." - Donna Fawcett.

"Shé, I have been studying a Masters of Metaphysics from a well reputed institute in the U.S (that will remain nameless)... and in one night (4 hours) of your psychic development course I learnt more than I have learnt in 6 months study with them..." - D. M.

Good things are being accomplished. Lives are being saved ...

Dear Shé, I am writing to you on behalf of my husband, Jason, whose reading you did at the Hervey Bay Psychic Expo recently.... I guess we had a delayed confirmation. You had told my husband how you saw his (deceased) Father working on something, like a pump. You also told him how Dad was concerned about dirty water getting near some feed, Lucerne or grass etc. You also told my husband how Dad kept mentioning someone named Ken and a business deal that he shouldn't do. Well, my husband had been mowing Dad's yard and during the day had been concerned about the amount of water coming out of the sillage hose. He tipped some grass clippings onto the area (instead of using them for feed, something he never does) and had a feeling to keep his feet out of the water. Lucky he did! Later that evening, all the power points wouldn't work in the house and the safety switch kept tripping out. We turned everything off, when my husband said he wondered if it was the sillage pump. It was! (Thank goodness he didn't step into the water on the grass clippings or he would have died.) So, my husband had to pull the pump out and the next morning arrange to get another. "Ken's Plumbing" was twice the price, so we did not buy it from there! So, we just wanted to let you know and thank you. Since then we have had many unexplained signs from Dad (now we know he is watching over us we pay attention to these) and my husband, Jason has said and done some strange things that seem to come directly from Dad, almost like he is channelling him.... Thank you" - Jenny

...and crimes are being solved. Apart from all of the information I gave police on the Daniel Morcombe case being confirmed in the Sunday Mail article of 4 July there has also been this interesting case about which we can still do something to help... (See Next Column)

Hi Shé, My name is Megan Cullen and you did a reading for me on March 30th. We spoke about my kidnapped friend in Somalia, Nigel Brennan. You might be interested to read this article:

<http://www.abc.net.au/news/stories/2009/05/26/2580764.htm>

Like you said, he is alive, he has been shackled and his health is deteriorating. I did pass your ex Army friend's number onto Nigel's closest friend...but he said that the family thought he was gone already. It's a shame, because I believe your friend might be able to help. My Dad is ex-SAS and I asked his advice and he said he wouldn't be waiting around for the government to do anything. Well just thought I'd let you know this info (and that you were correct.) Thank you again for your help - Megan

WE CAN ALL STILL HELP THIS MAN

It was wonderful to see journalist David Rohde has recently escaped from capture and has been returned to his family.

It was a shame to see his case get so much attention in the Australian media when our own Nigel Brennan remains hostage and has been held with very little attention from our own media. He was captured during our federal elections and his case has not been handled due to foreign policy difference between our former government and the present one. He remains a political pariah without the Australian government acting on his part. I thought that the media in Australia would be more concerned, and placing pressure on the government to act to retrieve one of their own

I was made aware of his case when the Chief of Staff of the Sunday Mail Brisbane and photographer Megan Cullen came to see me in my professional capacity as a psychic 3 months ago to find out if he was still alive after 9 months without contact from him. They presented me with the photo above without supplying me any further details. I was able to tell them that he was definitely not in the spirit world but was very ill and being held in a small, dark place in chains and that he was rapidly losing hope. (See Megan's email to me left)

Two months later this photo to the right was released from Al Jazeera television. The details released with it were that he is gravely ill, as can be seen from the photo on the left, and is being held in a small, dark place in chains. Then in a phone call to the AFP news agency on Tuesday May 26, 2009, from an undisclosed location, Mr Brennan issued a desperate plea for help. "I've been shackled for the last four months ... My health is extremely poor and deteriorating rapidly due to extreme fever, I implore that my Government help me as a citizen of Australia. I ask for the help of my family in every way possible so that the ransom can be paid for my release."

I feel his time is short. Australia needs to act immediately to secure his release. An opportunity still exists for our government to demonstrate that it will defend the interests of Australian citizens, not just the interests of big foreign governments and multi-nationals.

His kidnapping has been one of the longest in recent cases of abductions in Somalia, which is one of the world's most dangerous countries for journalists and aid workers. All previous kidnappings of journalists have ended with the release of the hostages amid claims that ransoms were paid.

Having felt from inside him what it is like to be ill and feel totally abandoned and condemned to die as a captive far from home by your own government, I beseech you on his behalf, please join Megan's petition to have him released and returned to his own family before it is too late. Link below.

P.S. Shé wants you all to remember that the work that Shambhallah Awareness Centre accomplishes in raising public awareness of the old ways, psychic skills and ancient wisdoms as well as empowering individuals, is not just done by the Rev. Dr. S. D'Montford. There are a team of dedicated individuals that give their time, effort, energy and resources to help bring all this accurate information and energy to you. Though there are many who have assisted us, in this issue we would like to thank. Fiona Miles, Lucas Preedy, Chrissy ne-Lawrence, Ken Wills, Konnie and John Gold, Leonie Rose-Jones, Shane Jones, Hania, the many others who talk about and share the information that they receive through our publications, public talks, websites, workshops, retreats and personal attention. You are the ones who make this all possible.

THANK YOU ALL
